As a graduate from Maynooth University with a strong passion for computer science, I pride myself on being customer-focused and having a positive, can-do attitude that motivates those around me. Whether working independently or as part of a collaborative team, these traits have consistently enabled me to excel in various roles and contribute positively towards achieving common goals.

## EXPERIENCE

### **JUNE 2024 - PRESENT**

#### **INTEL CAMPUS SECURITY, SECURITAS**

As command centre security on the Intel campus, my responsibilities include:

- Asset protection, security monitoring, life safety systems
- Creating incident reports
- Security dispatch and support

### **AUGUST 2022 - AUGUST 2023**

#### **SOFTWARE ENGINEER INTERN, TAOGLAS**

As an intern at Taoglas, my responsibilities included:

- Collaborating with cross-functional teams to develop software in line with their organizational goals.
- Using Java and Python, I developed API calls to leverage and collate their industrial IOT sensor network.
- Participated in daily scrum meetings, providing updates on progress, and identifying potential roadblocks.
- Contributing to the improvement of development practices, emphasizing code quality, efficiency, and scalability.
- Working on documentation and presentation of technical findings and solutions.
- Engaging in continuous learning through mentorship, workshops, and individual research to expand my skill set and industry knowledge.

### **NOVEMBER 2018 - TO AUGUST 2022**

#### **VERIFICATION OFFICER, SGS (NDLS)**

In my role as Verification Officer for the NDLS, my responsibilities included:

- Training in new employees
- Resolving disputes when dealing with the public
- Trained extensively on GDPR, as I dealt with sensitive information daily
- Opening and closing the centre, verifying documents and processing driving licenses for customers across different operating systems

### **JANUARY 2017 - NOVEMBER 2018**

#### **MANUFACTURING TECHNICIAN, RETRONIX**

With Retronix in Intel, Leixlip, I was contracted to assist during Intel's

Automated Material Handling System upgrade program. During these upgrades I was responsible for:

- Transferring wafers stored in FOUPS from stockers to production equipment. The task required great attention to detail as these wafers are worth millions of dollars.
- I worked 12-hour day and night shifts and maintained perfect timekeeping and attendance records for the duration of the contract.

#### **JANUARY 2015- JANUARY 2017**

#### **STOREMAN, CONTROLLED ENVIRONMENT COMPANY (CEC)**

With CEC my daily responsibilities varied between:

- Taking in deliveries at the dock, putting the stock on the shelves in the storeroom and serving customers
- I was trained on how to order WIINGS items (important machine spare parts) which I would order online, collect at a location on site and deliver and install the parts into industrial vending cabinets which are located all around site.
- CEC also stock and maintain all the PPE cabinets on site, and it was my responsibility to keep these at correct stock levels in the cleanroom and SubFabs.

## **EDUCATION**

#### **SEPTEMBER 2021 TO PRESENT**

#### **BA COMPUTER SCIENCE, NUI MAYNOOTH**

#### **2016 TO 2018 (2 YEARS COMPLETED)**

#### **BA IN CREATIVE DIGITAL MEDIA, TECHNICAL UNIVERSITY DUBLIN (TUD)**

#### **2014 TO 2015**

#### **ADVANCED/HIGHER CERTIFICATE IN ART DESIGN AND MIXED MEDIA, BALLYFERMOT COLLEGE OF FURTHER EDUCATION**

## **SKILLS**

- React
- Node.js
- Python
- Java
- Manual Handling
- PSA License
- Safepass
- Full Driving License

## **ACTIVITIES**

- Maynooth University's Computer Science Club
- Coaching under 9 kids football for Kilcock Celtic
- Art exhibitions
- Motorbikes
- Dog training
- Gaming
